## **DETAILED ACTION**

### ***Specification***

1. The abstract of the disclosure is objected to because of the legalese language "comprises". Correction is required. See MPEP § 608.01(b).

### ***Allowable Subject Matter***

2. Claims 1-19 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art of record neither shows nor suggest an OLED structure comprised of, in part, a multilayer mirror over said substrate, said multilayer mirror comprising an alternating series of (a) planarizing layers having a first refractive index and (b) high-density layers having a second refractive index that differs from the first refractive index wherein the thicknesses of said planarizing layers and of said high-density layers are selected such that said multilayer mirror is tuned to transmit light at a peak wavelength within said range of wavelengths, and wherein said planarizing layers and said high-density layers cooperate to restrict transmission of water and oxygen.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

***Conclusion***

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Dodabalapur et al. (US 5,814,416) discloses the state of the art for a microcavity organic light emitter.
